

Industrial Connectivity & Communication

Current Subscriber Base: 59,000+

GlobalSpec

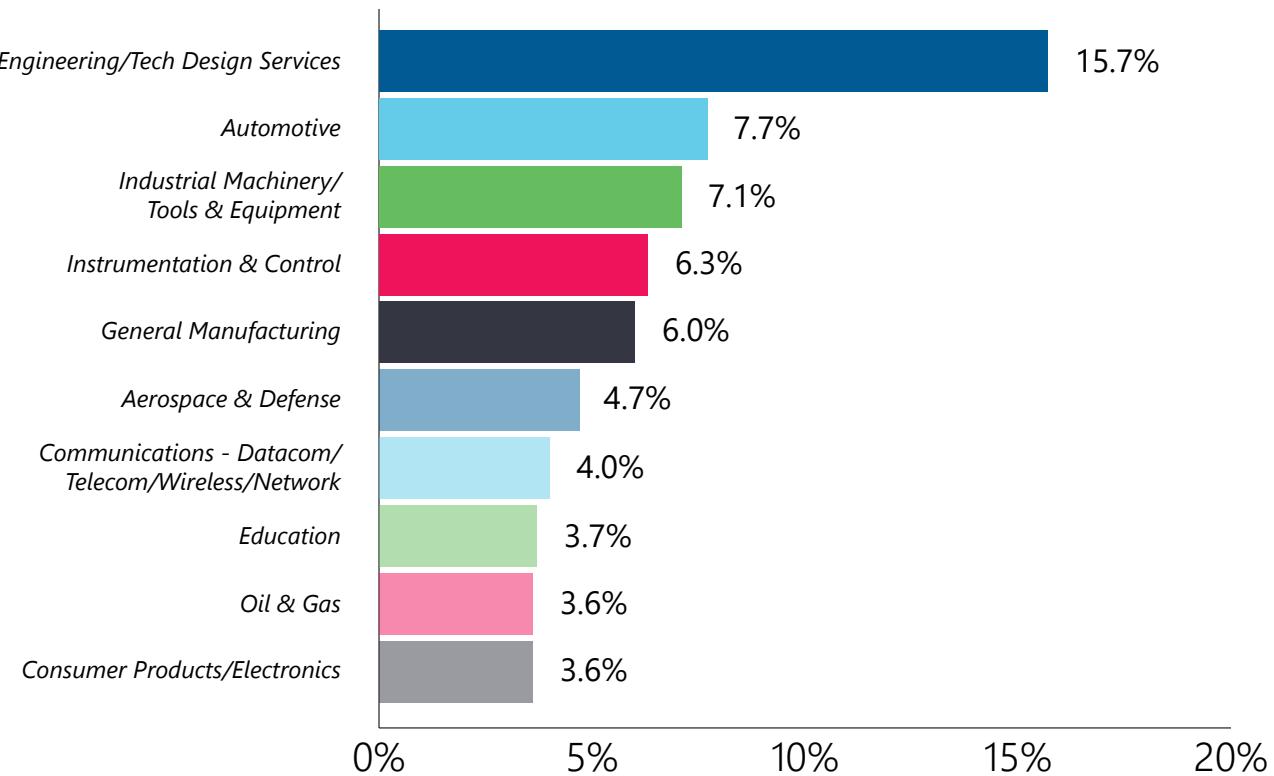

Subscribers to the Industrial Connectivity & Communication newsletter gain valuable insights into networked systems, IoT, and data communication advancements that power industrial environments. Content spans everything from IIoT sensors to edge computing and real-time data monitoring, tailored for industrial network engineers, IT specialists, and automation professionals. Readers will learn about products like data centers, Ethernet switches, wireless routers, and connectivity protocols that ensure seamless communication across machinery, systems, and devices, with a focus on security, reliability, and performance.
