

# Industrial Imaging

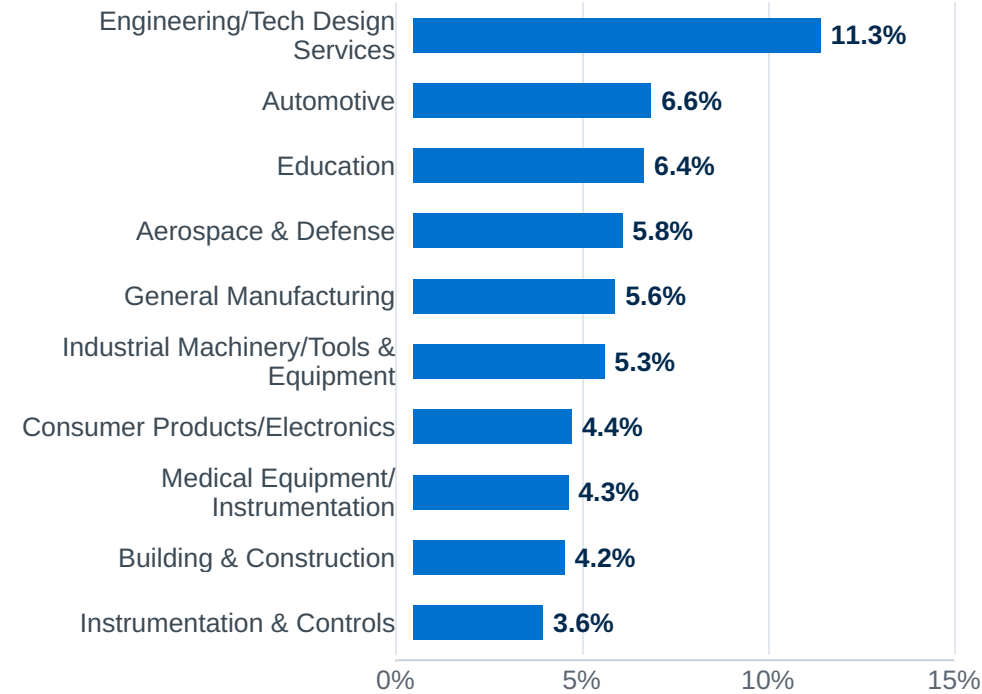

The Industrial Imaging newsletter explores optical and photonic technologies that enhance detection, inspection, and automation. Topics include machine vision systems, optoelectronic sensors, optical components, software systems, and advanced illumination technologies for sensing, quality control, metrology, and process optimization. This newsletter will help manufacturing, process, optical, and automation engineers and QA/QC officers stay current in this fast-moving and highly technical field.

\*Percentages do not equal 100% because some subscribers did not complete the country field during registration.  
 †Target circulation is a subset of newsletter subscribers to this title. Dormant and disengaged subscribers are suppressed from sends and an additional curated audience that includes behaviorally targeted readers is included. Due to the nature of these groups, exact number will vary by issue.
